

Computer Information Systems Department / STARS Alliance

Activities at Livingstone College and Salisbury HS

Monday, November 19, 2012

The Livingstone College STARS Alliance group under the auspices of the CIS department met with the Salisbury HS girls in our continued outreach of JAVA for non-computing students project on November 19. Hands-on activities in JAVA coding were done.

Monday, November 26, 2012

Monthly meeting of the LC Group. We discussed the Fall project activities, including on campus mentoring, and setting new projects and goals for Spring 2013. We will continue with the JAVA project at the Salisbury HS and this will be expanded. The team will comprise five (5) CIS juniors and one CIS senior who will complete the JAVA curriculum and deliverables. In addition, we will be embarking on a Web development project using HTML as the coding language. This project will have 5 students responsible for the deliverables.

Our third project for Spring 2013 will encompass research writing with a team of 3 students. emphasis will be on introducing students to research and research writing. A fourth project has been suggested as an "information alert" program for on-campus students alerts. A team of 4 will be working on the project details and deliverables.

The Teams for Spring 2013.

The teams and members are as follows:

1. JAVA Curriculum at Salisbury HS:

- Milton Pearson (Lead)
